WHAT'S NEXT FOR MIE SOLUTIONS UK LTD?

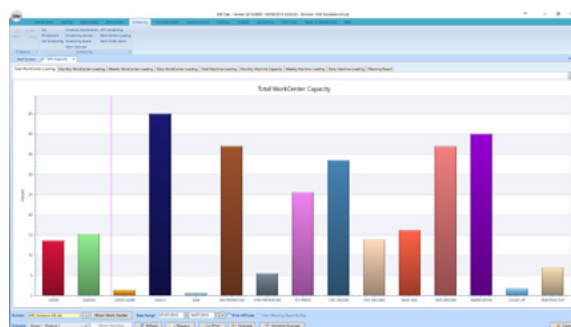

Our ongoing goal has always been to install MIETrak Pro into more manufacturing businesses and continue to be the sectors first choice for MRP and Production Control Software. However we never underestimate the power of current clients and will always strive to ensure they are receiving the maximum benefits from their investment with us.

It is always difficult to determine what brings in our sales. Is it advertising, websites, e-campaigns, brochures, exhibitions, editorials, social media, or Google? How do you judge and quantify what works and what doesn't?

So you ask yourself - "What is it that sets us apart from our competitors?" We firmly believe it is our customers - they are by far our biggest selling

tool. They promote our product to like minded people and businesses and are able to illustrate the major benefits of working with us from an unbiased perspective.

MIETrak Pro MRP & Production Control Software is sold as a complete manufacturing solution for all sectors and has been for over 25 years. It is offered as a complete solution rather than modular and

is cost effective, easy to install, implement and use. MIETrak Pro can be adapted to meet all your requirements as it is versatile and is constantly being updated. Both the product and team behind it can support the manufacturing industry with ease and most importantly will support you and your business as you continue to develop and grow.
